

How to do a Topical Study

8 Simple Steps

1. Select a topic to study.
2. List key words.
3. List verses based on key words using a concordance or online bible tool (www.blueletterbible.com)
4. Read through verses and select key verses.
5. Complete a verse analysis on key verses using what you learned in the verse analysis study lesson.
6. Summarize what you learned.
7. List questions and problems.
8. Complete a topical summary that includes what you learned, your questions, and the list of problems that require further study.

Helpful hints and tips for completing a topical study

- If you do not know of a particular topic you would like to study, pick a book of the bible and start reading. When a topic you are interested comes to mind, get started!
- Collaborate with others to identify key words related to your topic.
- Try to force yourself to write out what you have learned. You can use the topical study outline form to help you.

Keep in mind that your questions and the problems you list during your study are great catalysts for further study.
